

## Anvil Spring Canyon Groundwater Basin

- Groundwater Basin Number: 6-82
- County: Inyo
- Surface Area: 4,810 acres (7.5 square miles)

### Basin Boundaries and Hydrology

This groundwater basin underlies Anvil Spring Canyon in the southern Panamint Range of southern Inyo County. This basin was previously named Spring Canyon Valley Groundwater Basin (DWR 1975). The basin is bounded by impermeable rocks of the Panamint Range within Death Valley National Monument with Warm Springs Mine on the north and Sugarloaf Peak on the south (Jennings and others 1962). Surface water is drained eastward to Death Valley by Anvil Spring Canyon. Annual precipitation averages 4 to 6 inches.

### Hydrogeologic Information

#### ***Water Bearing Formations***

Groundwater is likely found in alluvium of Quaternary age. Such alluvium likely consists of unconsolidated, fine- to coarse-grained sand, pebbles, and boulders with variable amounts of silt and clay.

#### ***Restrictive Structures***

Unknown.

#### ***Recharge Areas***

Recharge to the basin is most likely from percolation of precipitation and runoff from the surrounding mountains.

#### ***Groundwater Level Trends***

Unknown.

#### ***Groundwater Storage***

**Groundwater Storage Capacity.** Unknown.

**Groundwater in Storage.** Unknown.

#### ***Groundwater Budget (Type C)***

No information is available.

#### ***Groundwater Quality***

**Characterization.** Unknown.

**Impairments.** Unknown.
